

Varenes November 17 2013

We procured an ARI-100 robot from Robotics Design four months ago, and since this time we work with this robot almost every day, and we are very satisfied with its efficiency.

Not only is the robot much more user-friendly and versatile than our old robots, but it is also more reliable, and the quality of imaging is extraordinary, which is of the utmost importance for us, as we work in the sanitation of air conditioning ducts.

The training received and the technical support of Robotics Design have met our highest expectations.

It is clear that our next robots will also come from Robotics Design.

Thank you to all the team.

Martin Garon, Owner of Air Innovation
